Providing the line capacity, manufacturing expertise and dedication to personalized customer service necessary to deliver on short- or long-run orders, PBS Plastics is backed by three decades of success extruding customized tubing, parts and profiles for any size medical company.

As a certified ISO 9001:2008 company, PBS Plastics offers tighter tolerances and quality control due to:

- Environmentally controlled white room with multi-line production for tubing and profiles that meet medical specifications
- Team atmosphere encouraging hands-on problem solving, in-depth process knowledge and personal attention to every order
- Close, strategic relationships with equipment and material suppliers throughout the U.S.

A passion for quality and customer service

You can count on us

PBS PLASTICS PILLARS OF EXCELLENCE

Quality Products | Trusted Value | Dedicated Service

Manufacturers in the medical industry rely on PBS Plastics for precision and on-time delivery.

Our medical plastic products are essential components of fluid delivery systems, catheters, surgical devices, advanced medical tubing, lab and analytical devices, medical and pharma filtration, and more.

AS AN INDEPENDENTLY OWNED and operated company, PBS Plastics is proud to have fostered a new kind of culture that supports continual product quality improvement.

We believe in long-lasting business connections built on:

- Personal attention to every order
- Decades of experience and trust
- Capacity to hit critical lead times
- Experienced R&D team
- Competitive pricing
- On-time delivery

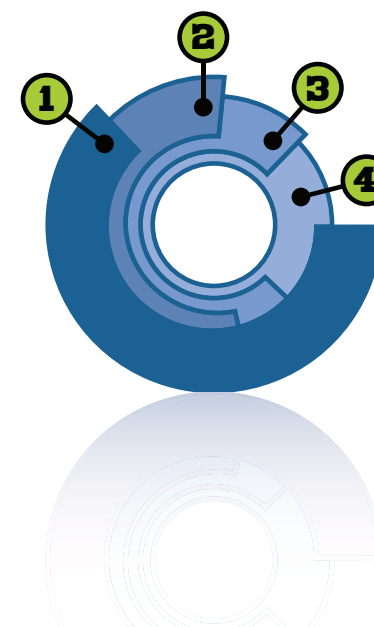

PBS Plastics continues to benefit from its founding vision as a customer service company that extrudes superior quality plastic tubing and profiles.

Tube thicknesses based on a wide variety of needs

The PBS Plastics Agile Advantage™ to manufacturing offers exceptional value

At PBS Plastics, we have a vision for tomorrow's custom extruded plastics market: To go beyond the traditional manufacturing model and paint a bigger picture of a smarter, more agile production solution backed by industry experts who operate with a "can-do" focus on delivering exceptional customer service.

Our innovative Agile Advantage™ service model emphasizes a more reliable customer service experience and delivers on the promise of high quality, durable and precise custom extruded plastic tubing and profiles.

Step 1: DISCOVERY Flexible and responsive service defines how we operate. We leverage our decades of experience to understand your needs and make achieving quality and durability a simple and transparent process.

Step 2: R&D We tackle new projects without hesitation. Our in-house lab is where we test new materials and optimize line performance to meet demanding specifications.

Step 3: CUSTOM EXTRUSION Look no further for capacity to hit the critical lead times you need. Whether extruding unique materials or cutting to custom lengths, we offer maximum line flexibility and project responsiveness.

Step 4: CUSTOMER SATISFACTION Our goal is to ensure your complete satisfaction, every step of the way – and beyond. Every team member personally aspires to delivering nothing less than product excellence.

Medical Extrusions

We offer tight tolerance tubing and profiles in a wide range of available materials to suit your specific application.

Coextrusion – Combining multiple plastics for more versatile and distinctive properties

Multi-Lumen Tubing – Complex geometries for minimally invasive and multi-purpose surgical devices

Thermoplastic Elastomer (TPE) Tubing – The flexibility of rubber with the benefits of an easy grip

Profiles – Custom, medical-grade profiles with a wide variety of options

- Tolerances as low as +/- 0.0015"
- Wall thicknesses to your exact specifications and as low as 0.008"
- Tubing diameters starting at 0.125"

"The PBS team is great to work with. We know we can count on them to deliver quality tubing on time, every time."

Jerry Lynch
Materials Manager
SEQUEL MEDICAL

Tackling new materials without hesitation

All medical grade tubing applications are not the same. That's why our creative team oversees every project with an arsenal of flexible options that push beyond the typical tubing manufacturer's approach.

We've got it covered

Plastic tubing for sensitive medical applications
